X-inactivation of HSD17B10 revealed by cDNA analysis in two female patients with 17 β -hydroxysteroid dehydrogenase 10 deficiency. ... This is in line with normal X-inactivation and the expression of both alleles in different cells (functional mosaicism). RQ results of HSD17B10 cDNA did not differ significantly between male and female controls, which indicate that the genetic doses of mRNA of ...

Therefore, functional p53 inactivation is regarded as one of the important activities of Tax that account for its oncogenic potential. Several different mechanisms have been proposed for Tax inhibition of p53 transcriptional function. In this review we discuss these mechanisms and their implications on Tax oncogenicity and on possible therapeutic or preventive approaches for ATL.
