The subject of our thesis is the uniqueness theory of meromorphic functions and it is devoted to problems concerning Bruck conjecture, set sharing and related topics.

(PDF) Some Aspects of Uniqueness Theory of Entire and

Nevanlinna Theory but also involves some special p -adic properties and basic arithmetic properties. Results concerning p -adic entire functions only suppose a property involving 2 zeros of h . Polynomials of uniqueness for entire functions are characterized. Every polynomial P of prime degree $n \geq 3$ is a polynomial of uniqueness for p -adic entire functions, except if it is of the form $A(x^2 + a)x + B$. A ...

Meromorphic functions of uniqueness - CORE

The paper concerns interesting problems related to the field of Complex Analysis, in particular Nevanlinna theory of meromorphic functions. The author have studied certain uniqueness problem on ...

In this paper, we mention some recent results and problems in the uniqueness theory of meromorphic functions with shared values or sets. This work was supported by the NSF of China. This is a preview of subscription content, log in to check access.

Some Recent Progress in the Uniqueness Theory of Meromorphic

In 2011, Chen and Yi proved a uniqueness theorem for meromorphic functions which share three distinct values together with their first-order difference operators. Here, throughout this paper, we assume that the reader is familiar with the fundamental concepts and notations of Nevanlinna's value distribution theory, as found in [5, 13].

On Uniqueness of Meromorphic Functions and Their

In this paper, we deal with the problem of uniqueness of meromorphic functions that share one or two values

and obtain some results that are improvements of that of M. Ozawa, H. Ueda, G. Brosch, H ...

Uniqueness of Meromorphic Functions That Share Three Sets

Uniqueness and Differential Polynomials of Meromorphic Functions 187 Theorem 2. Let n, m, k be three positive integers, and $f(z)$ and $g(z)$ be two non-

UNIQUENESS AND DIFFERENTIAL POLYNOMIALS OF MEROMORPHIC

A recent increment to uniqueness theory has been to considering weighted sharing instead of sharing IM/CM which implies a gradual change from sharing IM to sharing CM. This notion of weighted sharing has been introduced by I. Lahiri around 2001 in [10, 11]

UNIQUENESS OF MEROMORPHIC FUNCTIONS THAT SHARE THREE SETS III

In this article, we deal with the uniqueness problems on meromorphic functions concerning differential polynomials that share fixed-points. Moreover, we greatly improve a former result. Proceeding as in the proof of Proposition 2, we shall obtain that Proposition 1 holds. Next, for the proof of our
